

Appl. No. 10/804,626
Amdt. dated 03/17/2006
Reply to Office Action of 11/17/2005

Amendments to the Specification:

Please amend paragraph [0040] as follows:

[0040] Referring now to Figure 3, the arcuate access port cover 16 has a pair of cover flanges 18 and 19. The cover flanges 18 and 19 have a plurality of holes 21 to allow the fasteners 20 to extend through the holes 22 21 and provide a clamping force. The cover 16 is formed in an oval, rather than cylindrical, shape. The width of the cover is greater than two times the height of the cover. The width is measured from cover flange 18 located at one extreme end of the cover to cover flange 19 located at an opposite extreme end of the cover. The height is measured from a bottom of the cover to a top of the cover located at the top centerline.
